

LOVERT®

BLANK NONIONIC INVERT OIL - No Diesel Required

• DRIFT CONTROL • PENETRATOR • STICKER • AQUATIC •

ACTIVE INGREDIENTS: 100% Hydrocarbon Constituents Plus Selected Emulsifiers

LOVERT Invert Oil is a new specialty-use adjuvant. It contains no herbicide and inverts at low rates.

LOVERT Invert oil is a unique formulation of solvents and emulsifiers.

LOVERT is ready to use with all types of inverting equipment. It produces a thick mayonnaise-like invert when combined with water and herbicides.

DIRECTIONS FOR USE

- Inject LOVERT from a separate tank compartment (or its own container). Use various orifice sizes and valve settings for desired rate and volume.
- LOVERT's oil to water phase can be varied over a range from 1-10 to 1-40, depending on the type of equipment and herbicides used.
- Be sure to read all label directions regarding herbicide-added-to-water phase. Do not exceed label instructions for the herbicide rate per acre.
- If invert breaks, check equipment for air leaks; then adjust water and invert oil orifices. Water quality and temperature can affect the invert.
- Contact your local dealer for additional instructions.

KEEP OUT OF REACH OF CHILDREN

See precautionary statement on side panel.
