

FEATURES AND BENEFITS

- Low foam nonionic spreading and wetting surfactant.
- Can be used with algaecide, fungicide, herbicide, insecticide, defoliant, desiccant, and fertilizer.
- Breaks down waxy cuticles of leaf surfaces to enable pesticide uptake.
- Can be used in difficult wetting conditions, e.g., hard water or when foliage is mature and waxy.
- Can be used in agriculture, citrus production, turf, utility rights of way, and aquatic systems.

DIRECTIONS FOR USE

- To prepare pesticide spray solution:
 - o Fill spray tank half full of water and begin agitation.
 - o Add pesticide and fertilizer as recommended.
 - o Add Brewer 90-10 while continuing agitation.
 - Continue agitation until spray tank is full and during the application of the pesticide spray solution.

APPLICATION AND USE

- Air and ground applications:
 - o 1 4 qt. per 100 gal.
- Handheld and backpack sprayer:
 - o 1 3 oz. per gal. of spray solution.

Always read and follow all label directions.

IMPORTANT POINTS

- **Brewer 90-10** provides improved control of:
 - Nuisance aquatic weeds, e.g., cattail, phragmites, duckweed, milfoil, water hyacinth, parrot feather, and others.
 - Weeds when used with herbicides containing glyphosate, diquat, triclopyr, 2,4-D, imazapyr, and others. Always read and follow pesticide label instructions.
 - Algae when used with copper based algaecides, e.g., copper sulfate and chelated copper.
- Brewer 90-10 is a low foam nonionic wetting and spreading agent which enables enhanced retention and penetration of herbicides that leads to better plant control.

AVAILABLE SIZES

- Quart
- Gallon jug
- 2.5 Gallon jug
- 15 Gallon drum
- 30 Gallon drum
- 250 Gallon tote
